

AART

Adrian & Richard's Technologies

Remora™ eCom — Intellectual Property License

Version 1.2 · Effective: April 2026 · aart.dev · licensing@aart.dev

Preamble

This license governs the use, reproduction, and distribution of the **Remora™ eCom** — an electronic commutator (eCom) for slot car racing, developed by AART (Adrian & Richard's Technologies), a collaboration between **Adrian Blakey** and **Richard Lang**, with supporting contributions from **Arseny Vakrushev (ESCAPE32™ firmware)** and **Keith Gibson**. The intellectual property ("IP") is inspired by and structured in the spirit of Creative Commons licensing principles, adapted for hardware and associated documentation.

The IP is freely available for personal non-commercial use. Commercial use requires a separate negotiated license. By downloading or cloning the IP from the AART GitHub repository, the licensee **implicitly and irrevocably agrees** to the terms of this license.

Important: AART does not commit to maintaining this repository indefinitely. The repository may be moved, restructured, or discontinued at AART's discretion. The license grant is perpetual and one-time; no ongoing obligation to host or maintain the IP is implied.

1. Definitions

"IP" or "Intellectual Property" means the totality of materials released by AART under this license relating to the Remora™ eCom, including without limitation:

- The requirements document;
- The test plan;
- The electronic design as expressed in KiCad project files;
- Manufacturing output files (Gerber files, pick-and-place placement files, Bill of Materials);
- The support Wiki and any associated documentation;
- Any additional documents subsequently designated by AART as forming part of this IP.

"Licensee" means any individual or entity that downloads, clones, forks, or otherwise obtains the IP.

"Personal Use Board" means a physical board manufactured by or for the Licensee for their own personal, non-commercial use, in quantities not exceeding approximately ten (10) units per calendar year.

“Commercial Board” means any board manufactured in excess of the Personal Use limit, or manufactured for sale, exchange for value, or commercial distribution, irrespective of quantity.

“Derivative Work” means any modification, adaptation, or derived design based in whole or in part upon the IP.

“AART” means Adrian Blakey and Richard Lang, trading as Adrian & Richard’s Technologies, contactable at <https://aart.dev> and licensing@aart.dev.

2. License Grant

2.1 Personal Non-Commercial Use

Subject to the terms of this license, AART grants the Licensee a worldwide, royalty-free, perpetual, non-exclusive license to:

- Download, copy, and study the IP;
- Manufacture Personal Use Boards using any manufacturer, including AART’s recommended vendor JLCPCB or any other;
- Distribute Personal Use Boards freely (without charge) to friends and family who are slot car racers.

Personal Use Boards must not be sold, exchanged for value, or distributed in commerce. They must be given freely to friends and family only.

2.2 Commercial Use

Any use beyond the Personal Use scope described in Section 2.1 — including but not limited to manufacturing more than approximately ten (10) boards per year, selling boards, or distributing boards commercially — constitutes **Commercial Use** and requires a separate written license agreement with AART.

The standard commercial manufacturing fee is **approximately USD 1.00 per board manufactured** (not per board sold). This fee is due and payable to AART upon receipt of boards from the manufacturer. Prospective commercial licensees must contact AART at <https://aart.dev> or licensing@aart.dev prior to commencing manufacture to obtain remittance instructions and execute a commercial license agreement.

2.3 Registered Charities

Registered charitable organizations wishing to engage in commercial activity involving the IP should contact AART at licensing@aart.dev to negotiate appropriate terms. AART will consider reduced or waived fees on a case-by-case basis.

3. Board Marking Requirements

3.1 All Boards

Every board manufactured under this license must display the following attribution on its silkscreen or other permanent marking:

Remora™ (CC BY symbol) AART™ ESCape32™

Specifically:

- **Remora™** — the product name and AART trademark;
- The Creative Commons “**By**” **Attribution symbol** (CC BY) as specified at <https://creativecommons.org/mission/downloads/>;
- **AART™** — the manufacturer attribution trademark;
- **ESCape32™** — the ESCape32 logo and trademark as required by that project.

There are no restrictions on other manufacturing choices, including but not limited to: board colour, solder mask, additional graphics, copper weight, surface finish, or board material.

3.2 Personal Use Boards — Additional Marking

Personal Use Boards must also display a **slashed currency symbol** (the Creative Commons non-commercial indicator, as available from <https://creativecommons.org/mission/downloads/>) to clearly identify them as non-commercial.

3.3 Commercial Boards

Commercial Boards licensed under Section 2.2 are not required to carry the slashed currency symbol and may additionally carry the commercial vendor’s own logo and branding.

4. Derivative Works

If the Licensee creates a Derivative Work, the following conditions apply:

4.1 Attribution

The Derivative Work must clearly acknowledge that it is derived from the Remora™ eCom by AART. This acknowledgement must appear in all associated literature, whether printed or electronic, and in the design’s documentation.

4.2 Share-Alike

The IP of any Derivative Work must be distributed under the **same terms as this license**. The Licensee may not apply additional restrictions to the Derivative Work beyond those contained herein.

4.3 Return to AART

The Licensee must provide a complete copy of the Derivative Work's IP to AART. AART shall have the right, but not the obligation, to:

- Incorporate elements of the Derivative Work into the base Remora™ eCom design;
- Redistribute the Derivative Work IP under this or any other license AART deems appropriate.

This obligation arises at the time the Derivative Work is first distributed or manufactured (whichever is earlier).

5. Derived Documentation

5.1 Republication and Reuse of AART Documentation

Any party — whether a commercial vendor or a non-commercial user — who republishes, reproduces, or redistributes any AART documentation forming part of the IP, either verbatim or in reworded, adapted, translated, or summarized form (“Derived Documentation”), must comply with the following conditions.

5.2 Attribution Requirement

The Derived Documentation must carry a clear and prominent attribution stating that it is based upon, derived from, or copied from AART source material. The attribution must include a reference to the original AART source (for example, a URL to the AART GitHub repository or Wiki) and must appear in a position reasonably visible to any reader or user of the Derived Documentation.

5.3 Notification to AART

Prior to, or promptly upon, first publication of any Derived Documentation, the party responsible must notify AART by email at info@aart.dev, providing:

- A copy of the Derived Documentation (or the relevant portion thereof); and/or
- A URL or other link to the location at which the Derived Documentation appears or is published online.

AART reserves the right to request removal or correction of Derived Documentation that misrepresents the original source material or omits the required attribution.

5.4 Disclaimer of Currency and Accuracy

AART's written documentation — including the requirements document, test plan, Wiki, README files, and any other supporting materials — is maintained on a best-efforts, occasional basis as AART's knowledge and experience develops. AART makes **no guarantee as to the currency, completeness, or accuracy** of any documentation at any given time. The documentation may lag behind the current state of the design, firmware, or manufacturing recommendations.

Any party publishing Derived Documentation is strongly advised to check the AART repository for the most recent version of the source material at the time of publication and to note the date on which the AART source was last consulted. AART accepts no responsibility for errors or omissions in Derived Documentation, nor for any reliance placed upon it by third parties.

6. Support

AART provides community support for the Remora™ eCom IP through the following channels:

- GitHub Wiki (associated with the IP repository);
- Discord (link available at aart.dev);
- Email enquiries via the aart.dev website.

Commercial vendors are solely responsible for providing first-line support for their own products. AART does not undertake any obligation to support commercially manufactured boards or end users of commercial products.

Commercial vendors wishing to engage AART for **second-line support** services should negotiate a separate support agreement with AART at <https://aart.dev>. AART will not provide second-line support to a commercial vendor in the absence of such an agreement.

7. ESCape32 Firmware

6.1 Standard Firmware Build

The Remora™ eCom board ships with, or is intended to run, a specific release of the **ESCape32™ open-source firmware**, maintained in the official ESCape32 GitHub repository. AART identifies and qualifies specific ESCape32 releases for use with the Remora™ eCom and is responsible for the support of that designated build in the context of this board.

The ESCape32™ firmware **will change from time to time** as the upstream project evolves. It is the **board owner's sole responsibility** to monitor these changes and apply firmware updates as appropriate. Updates may be applied by either of the following methods, for which instructions are provided in the board's Wi-Fi interface:

- **Wi-Fi Link:** over-the-air update via the board's built-in Wi-Fi interface;
- **Reflashing:** direct programming of the board using the procedure described in the Wi-Fi interface documentation.

6.2 AART Special-Purpose Firmware Builds

From time to time, AART may fork the ESCape32™ firmware and develop a special-purpose build for a specific feature or experimental purpose. Such builds will be distributed within a `bin/` directory in the repository, accompanied by a `README.md` file explaining the build's

purpose, intended use, and any known limitations.

Note: AART special-purpose firmware builds are provided with **no guarantee whatsoever**. Their installation and use is entirely at the board owner's own risk. AART accepts no liability for any damage, malfunction, or data loss arising from the use of a special-purpose build. The standard firmware warranty disclaimer in Section 9 applies in full.

8. Intellectual Property

All rights, title, and interest in and to the IP (other than as expressly licensed herein) remain with AART. The Remora™, AART™, and associated marks are trademarks of AART. ESCape32™ is a trademark of its respective owner.

AART makes no representation or warranty that the IP does not infringe the intellectual property rights of any third party. It is the Licensee's sole responsibility to conduct any necessary freedom-to-operate analysis and to obtain any third-party licences that may be required.

9. Disclaimer of Warranties and Limitation of Liability

THE IP IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, ACCURACY, COMPLETENESS, OR NON-INFRINGEMENT. AART DOES NOT WARRANT THAT THE DESIGN IS FREE FROM ERRORS OR THAT ITS USE WILL BE UNINTERRUPTED OR SAFE.

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL AART OR ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING BUT NOT LIMITED TO DAMAGE TO PROPERTY, PERSONAL INJURY, DEATH, LOSS OF DATA, OR LOSS OF PROFITS) ARISING OUT OF OR IN CONNECTION WITH THE USE OR INABILITY TO USE THE IP OR ANY BOARD MANUFACTURED THEREFROM, HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT.

The Licensee assumes all risk associated with the design, manufacture, assembly, and operation of any board produced using the IP.

10. Termination

This license is granted perpetually but will terminate automatically upon any material breach by the Licensee that is not remedied within thirty (30) days of written notice from AART. Upon termination, the Licensee must cease all use and distribution of the IP and any boards

manufactured under the terminated license.

Personal Use licenses survive in respect of boards already lawfully manufactured prior to termination.

11. Governing Law

This license shall be governed by and construed in accordance with the laws of the jurisdiction in which AART's principal contributors are domiciled, without regard to conflicts of law principles. Any disputes shall be resolved by negotiation in good faith, and if unresolved, by binding arbitration.

12. Miscellaneous

- **Entire Agreement:** This license constitutes the entire agreement between AART and the Licensee with respect to the IP and supersedes all prior representations and understandings.
- **Severability:** If any provision of this license is found to be unenforceable, it shall be modified to the minimum extent necessary to make it enforceable, and the remaining provisions shall continue in full force.
- **No Waiver:** Failure by AART to enforce any provision shall not constitute a waiver of the right to enforce it in the future.
- **Notices:** All notices and requests to AART should be directed to licensing@aart.dev.

Quick Reference Summary

This summary is provided for convenience only and does not form part of the license.

	Personal Use	Commercial Use
Max boards / year	~10	Unlimited (fee applies)
Manufacturer	Any (incl. JLCPCB)	Any
Distribution	Free to friends / family only	Commercial sale permitted
Fee to AART	None	~USD 1.00 per board manufactured
Slashed currency symbol	Required	Not required
Vendor logo on board	Not applicable	Permitted
Attribution on board	Remora™ + CC BY + AART™ + ESCape32™	Same
AART support	Community (Wiki, Discord, email)	Vendor responsible; 2nd line by agreement
Derivative works	Share-alike; return IP to AART	Same

	Personal Use	Commercial Use
Prior notification to AART	Not required	Required before manufacture
